SUBJECT: UNAVAILABILITY OF CalJOBS^{SM} WEB API SERVICE

The Workforce Services Branch (WSB) is currently working with our vendor, Geographic Solutions Inc. (GSI), to upgrade the CalJOBS application to comply with new *Workforce Innovation and Opportunity Act* (WIOA) performance and reporting requirements that take affect July 1, 2016. This means that effective July 1, 2016, the web Application Programming Interface (API) used to upload participant data to CalJOBS by Local Areas that are third party users will need to be updated to include the aforementioned requirements. As a result, this web API process is expected to be unavailable for at least 90 days while it's updated.

During the time the web API process is unavailable, Local Area third party users will be responsible for direct keying participant data into CalJOBS in order to comply with *CalJOBS*^{SM} *Participant Reporting* (WSD13-11). In accordance with WSD13-11, the WSB will <u>not</u> accept Data Change Requests from third party users for participant data not entered into CalJOBS during the web API down period. The WSB and GSI will provide additional guidance to third party users on the updated web API specifications once its available.

The following are key dates for this transition:

DATE	ACTION
June 30, 2016 – 5:00 PM	Final submission of WIOA data using existing web API application.
July 1 – September 30, 2016 (estimate)	CalJOBS web API will be inactive. Third party users will be required to comply with WSD13-11 during the web API down period.
TBD	WSB and GSI will schedule conference calls with third party system users to discuss new web API specifications.
TBD	Updated WIOA web API process will be available.

Please contact the CalJOBS Operations Unit at CalJOBSadmin@edd.ca.gov or 916-653-0202, for more information or to request technical assistance/support if you're a Local Area third party user.

/S/ JOSÉ LUIS MÁRQUEZ, Chief
    Central Office Workforce Services Division
