

FI\$CaI IMPLEMENTATION

Since 2005, the State of California has been engaged in the design, development, and implementation of the Financial System for California (FI\$CaI) Project. The core of the project is to replace the state's aging decentralized IT financial systems with a new system that will integrate the state's budgeting, accounting, cash management, and procurement processes. It will allow for greater transparency and standardize the state's financial practices.

In 2013, small state entities such as small boards, commissions, departments, and agencies slowly began the transition to the FI\$CaI system. Beginning July 1, 2018, the last "release" will occur which includes onboarding more than 60 of the state's largest departments. The Employment Development Department will be part of the July 2018 release and has been working closely with the Department of FI\$CaI and other state project sponsors to ensure as smooth a transition as possible.

At this time, it is not anticipated that the subrecipients of *Workforce Innovation and Opportunity Act* funds will be impacted by this transition. Subrecipients will continue to request cash and submit expenditure reports through CalJOBSSM.
